Specimen Tree Drainage Instructions

These directions will serve as guidelines to making a drain point for your new trees. These are intended to give you an idea of how it is done. Every installation is different and may require different material.

Materials needed to complete one 8ft x 8ft x 6ft planting hole

- 30ft 4 inch perforated PVC with drain sock or 4 inch black drain pipe with drain sock
- (2) 90 degree elbows either PVC or Black drain pipe
- (10) yards Course sand
- (2) yards Drain rock
- (1) 20ft x 20ft Black ground cloth or drain cloth
